

## **PAPER BRIDGES PROJECT**

This project has as its main objective to channel two people according to their tastes, preferences, age and... to start an exchange of MANUSCRIPT LETTERS. The correspondence can (and should) be original and, besides exchanging opinions, debate, expose successes of living, share personal experiences, etc.

This initiative has a clear aim: to promote the cultural exchange and the personal enrichment of the Tomiño society. Knowing other realities in order to be able to spread and change our society is one of the pending issues we have as a society. This exchange of information between different countries makes it possible to know new cultures and ways of life as well as to understand the present of these territories. In addition, we have the opportunity to make new beginnings in the world.

This flexible project is an attractive training experience for our local community. A plural and transversal initiative that adapts to the needs of each person. With this project you can relate in different languages and ask about realities or topics that are of your interest. This will be possible because before matching people from different backgrounds, we will collect a file with data and tastes of girls and boys participating with a cock to make the connection more fluent sex.

Thank you very much, OMIX TOMIÑO loves the active youth!

Here is an example of the questionnaire that you could give to your participants:

## Questionnaire

From OMIX Tomiño, we want to express our gratitude for the great reception that our project PAPER BRIDGES has had from you. As our purpose is making this experience as enriching as possible, we want to collect some information from each participant to be able to make the best matches depending of their tastes.
